Holyoke, Massachusetts, U. S. A.

## INTRODUCTORY

---

Other Door Hanger ever placed upon the market has been so widely imitated as *The Coburn*. The reason is obvious. In presenting this catalogue we wish to call especial attention to a number of new features and changes of importance. ¶ The goods illustrated and listed in this catalogue will be supplied on all orders received after July 1, 1916, as this catalogue supersedes all previous issues of our Door Hanger Catalogue. ¶ We also wish to call attention to the fact that we manufacture Rolling Ladders, Overhead Carrying Track and Carriers and Fire Proof Doors and Hardware, for all of which we issue separate catalogues, that we will gladly send upon request to anyone interested

## TERMS

All bills are payable in thirty days net, or a discount of two per cent. for cash in ten days from date of invoice.

Accounts overdue are subject to a sight draft.

All claims for errors in shipments or for shortages must be made within five days after receipt of goods.

Goods are sold f. o. b. cars at shipping point unless freight allowance is quoted.

All agreements are contingent upon strikes, accidents or other causes beyond our control.

Quotations are made for immediate acceptance.

We will replace free of charge any goods made by us that are found defective on account of material or workmanship.

Do not return any goods to us without first writing us for shipping instructions.

Prices in this catalogue, as well as discounts applying to same, subject to change without notice.

## HOW TO ORDER COBURN BARN DOOR HANGERS AND TRACK

---

**Note 1** When hangers are listed as **SETS** we pack 2 End and 1 Open brackets with each set, enough for two pieces of track, and for every piece of track used in excess of two, an extra open bracket is required.

**Note 2** When hangers are listed as **PAIRS** no brackets are included and you will require one more bracket than there are pieces of track, two of which must be end (or closed) and the balance open brackets.

**Note 3** For double barn doors order the same as though each door was to be hung separately; the builder will then begin at center of the opening with a right and left closed bracket and build each way the requisite length of track for each door. The closed brackets at center will serve as stops, preventing either door from passing that point. A center stop bracket will be furnished in place of the end brackets for center if desired.

**Note 4** If you have several doors to be hung on one continuous run of track, so advise that we may substitute some open brackets for the closed ones packed in each set.

**Note 5** We can provide to have two or more parallel runs of tracks, allowing doors to slide by each other by using the parallel ear brackets. See pages 15 and 21.

**Order by Numbers.** See Lists, pages 9 to 25.

## HOW TO ORDER COBURN BARN DOOR HANGERS AND TRACK

---

### Note 1

Ascertain probable weight of door and order track, hangers and brackets by number. Always give thickness of doors.

### Note 2

For doors not exceeding 300 pounds in weight use No. 1 track.  
For doors not exceeding 500 pounds in weight use No. 2½ track.  
For doors not exceeding 1200 pounds in weight use No. 4 track.  
For doors exceeding 1200 pounds special attention needed.

### Note 3

Brackets spaced four feet or five feet on centers will be sufficient if proper size track and hangers are used.

### Note 4

Nos. 1 and 2½ tracks are furnished in even foot lengths up to ten feet.  
No. 4 track in even foot lengths up to eight feet.

### Note 5

For parallel runs of track attached to face of wall, double or triple brackets as illustrated on pages 15 and 21.  
Use parallel ear brackets to attach track to underside of a heading timber.

### Note 6

Hangers designated A are for No. 1 track.  
Hangers designated B are for No. 2½ track.  
Hangers designated C are for No. 4 track.

# Barn Door Hangers

No. 190

## FLUSH DOOR HANGERS Roller-Bearing Carriers, Iron Trolleys

Adapted especially for stable doors where it is desirable to have the same shut tight, keeping out the cold and wind.

The petticoat on the door is constructed so as to allow the pendant from the carrier to slide back and forth so as to carry the door in flush with jamb and thus make the opening perfectly tight.

One Pair of Hangers for a single door includes two of each, roller bearing carriers, pendants and petticoats, one each top and bottom castings for side of door, lock and handle.

No. 190-a.	Hangers for No. 1 Track.....	Per Pair,	\$4.00
No. 190-b.	Hangers for No. 2½ Track.....	Per Pair,	5.00
No. 190-c.	Hangers for No. 4 Track.....	Per Pair,	6.00

Fastenings and Handle included in price of Hangers.

For Price List of Track and Brackets see pages 7, and 33-35.

## Garage Door Hanger

The illustration on this page shows the application of No. 195 Hangers to Swing and Slide Doors.

This combination is desirable in many instances in narrow garages.

In erecting, the door hinged to jamb should be the thickness of the door less in width than the other doors.

For prices, etc., see opposite page.

## How to Order Coburn House Door Hangers

**S**ELECT the style of Hanger wanted and give the number and the letter, if any, that corresponds to the size of the opening. A door filling an opening six feet wide is a six-foot single and requires a set of No. 8 or No. 8A, B, C, D or E, as desired. Two Doors each three feet wide in a six-foot opening is a six-foot double and requires a set of No. 15 or No. 15A, B, C, D or E. In any case where the opening is the same, whether one or two doors are used in the opening, the Track will be the same, the different numbers showing the size and whether single or double, and the letters showing style of Hangers wanted.

Overhead stops will be furnished if called for on order, otherwise we will send the regular Back Stop as illustrated on page 37.

Every set of Trolley Tracks, except the No. 65, whether for a single or double door, must be made up of two pieces when the door goes into a pocket. Never try to use one-half a double set for the hanging of a single door, as trouble will surely follow. You must have two pieces of track for each set with the exception of the No. 65. With the No. 65 on single sets up to six-foot, only one piece of track is required. On all double sets two pieces are required.

To ascertain extreme length of pocket space required for any set of Trolley Tracks and Headers, double the width of opening and add six inches for the two end lugs.

## DIRECTIONS FOR APPLYING BACK STOPS FOR DOUBLE HOUSE DOORS

Attach the "Stop Button" to the back stile of door midway between top and bottom of door, by using the 3-inch lag screws, allowing the square end to project one-half inch.

Drive a nail or brad in the back edge of door for the notch of the button to rest against and in such a position as to hold the button squarely across the door so that it will come in contact with the rubber bumper in the stop plate. Fasten the "Stop Plate" to the left-hand jamb, cutting same in flush; cut away the edge of the jamb so that the "Stop Button" can pass and strike bumper in the plate. The box casing will cover the "Stop Plate." To remove door from pocket insert a case-knife blade, turn up the stop button and door can then be rolled out of pocket.

### SPECIAL NOTICE

We furnish when ordered specially two kinds of **Overhead "Stops,"** "Astragal" and Plain. Unless otherwise specified, we always send the **"Back Stops."**

# House Door Hangers

No. 65

Ball-Bearing Carrier

## NOISELESS SINGLE WOOD TRACK ADJUSTABLE HANGER

Header can be attached to heading timber without removing track. Doors can be taken off and put on track after same is in position without removing track. Track can be taken out and adjusted, if necessary, and put back at any time by simply removing one screw. The adjustment in the hanger is most accessible and can be made with ordinary screw-driver without the trouble of removing cotter pins or other locking devices.

The track is so constructed as to be extremely rigid. These hangers being the easiest and quickest to apply of any hanger made.

Hangers only for Single Doors .....	Per Set, \$1.50	4 lbs.
Hangers only for Double Doors .....	Per Set, 3.00	8 lbs.

When ordering track without hangers the list price is found by deducting the list price of hangers only from the list prices given for the various sizes.

This style hanger is designed especially for use when head room is limited. The distance required from top of door to underside of heading timber is 6¾ inches.

Allow for pocket space at least one inch in excess of thickness of door.

For length of pocket space required double the width of opening and add six inches for the two end lugs.

## House Door Hangers

Hangers only for Single Doors.....Per Set, \$1.75 5 <sup>1</sup>/<sub>4</sub> lbs.  
Hangers only for Double Doors.....Per Set, 3.50 11 lbs

Hanger with Adjustable Pendant so arranged that no weight is placed on adjusting screw which is on the front edge of door and is the most accessible of any Adjustable Hanger made. It allows the door to be raised until it touches the track and consequently requires only the minimum of head room. No more than required for rigid pendant hangers.

When ordering track without hangers the list price is found by deducting the list price of hangers only from the list prices given for various lengths.

Distance from top of door to underside of heading timber, five inches.

House Door Hangers

No. 200

Roller-Bearings, Double Fibre  
Trolleys

No. 4.	Track	Per Foot,	.50
Parallel Ear Brackets for No. 1 Track		Each,	.25
Parallel Ear Brackets for No. 2½ Track		Each,	.40
Parallel Ear Brackets for Nos. 3 and 4 Track		Each,	.80

## DIRECTIONS FOR APPLYING NO. 600 STYLE HANGER

Select size of Carrier and Track suitable for the thickness and weight of doors to be hung.

Track should equal full width of openings and brackets used as indicated in price list.

Distance from underside of header to top of door will be 4½ inches for No. 1 Track, 6½ inches for No. 2½ Track, and 8 inches for Nos. 3 and 4 Track.

Any number of doors can be used, beginning with a **half door**, hinged to a strip attached to the jamb on one or both sides according to the proposed way of folding the doors. The half door must be exactly one-half the width of the full-sized doors, **less the thickness of the strip to which they are attached.** The full-sized doors must be of an exact width, top and bottom, and edges perfectly parallel. Hinge the doors together, fold them and strike a center line across them all. Attach Carriers on the center of this line, having the center of the pendant on the exact center of the door, considering both width and thickness. **Attach One Carrier to every other door.**

## House Door Hangers

No. 80

**Roller-Bearing, Single Iron or  
Fibre Trolleys, Rigid Pendant**

Packed in sets with stops, guides  
and screws.

Used with Rail and Headers fur-  
nished with Nos. 75, 85 and 100  
Style of Hangers.

### PRICE LIST

Hangers only for Single Doors,  
Per Set, \$1.25

Hangers only for Double Doors,  
Per Set, 2.50

Distance from top of Door to under-  
side of heading timber, six inches.

# Electric Car Shed and Pier Door Hangers

No. 700

**Carriers rigidly attached to Pendants when used on Electric Car  
Shed Doors**

**Used with No. 4 Track only**

Doors of these kinds are usually very heavy and must have strong attachments. The Track may be attached to the building by the use of "Side Wall" or "Parallel Ear" brackets. Note the opening left between the sections of tracks where trolley wires enter the building. In requesting estimates always advise height, width and thickness of doors, how many runs of track needed, style of bracket, the number of trolley wires entering building and accurately locate these as regards distance of one from the other.

## PRICE LIST

No. 4 Rail . . . . .	Per Foot,	\$0.50
